

# Hari Priya

itsharipriya8919@gmail.com | Manchester, United Kingdom

## SUMMARY

Experienced and driven Software Engineer with 4+ years delivering secure, scalable systems across healthcare, e-commerce and enterprise domains. Hands-on expertise in microservices, RESTful APIs, event-driven architecture, workflow automation and system integration, with the ability to adapt across diverse technical and business contexts. Skilled in mentoring junior engineers, fostering cross-team collaboration and delivering business-critical applications. Enjoys tackling complex, real-world problems, finding creative ways to simplify them, and building technology that makes a meaningful difference to people.

## TECHNICAL SKILLS

**Languages:** Ruby, Java, Python, SQL, JavaScript

**Frameworks & Libraries:** Ruby on Rails, Spring Boot, Spring MVC, Spring Data JPA, Hibernate

**Databases & Caching:** PostgreSQL, MySQL, MongoDB, Redis, Query Optimisation

**Messaging & Asynchronous Processing:** Apache Kafka, SNS, SQS, Sidekiq

**Architecture & Design:** Microservices, Event-Driven Architecture, Distributed Systems, RESTful APIs, OOP, SOLID, Design Patterns

**Cloud & DevOps:** AWS (EC2, S3, RDS, DMS, MSK), Docker, Kubernetes, Jenkins, CI/CD, Linux, Bash

**Testing:** JUnit, RSpec, Mockito, TDD, Unit Testing, Integration Testing

**APIs & Tools:** Postman, Swagger, Git, GitHub, Bitbucket, JSON, XML

**Monitoring & Observability:** Sentry, New Relic, Kibana, CloudWatch

**Collaboration & Practices:** Agile, Scrum, Code Reviews, Jira, Confluence

**ML & AI:** PyTorch, Hugging Face Transformers, LLMs, VLMs, PEFT/LoRA, Fine-tuning, scikit-learn, NLTK, Pandas, NumPy, Matplotlib

## PROFESSIONAL EXPERIENCE

### Software Development Engineer

Oct 2022 - Jun 2025

Tata 1mg

Bangalore, India

- Engineered backend workflows and integrations for ODIN, a warehouse management platform serving healthcare and retail operations, spanning inventory, order fulfilment, procurement and Supply Chain Management (SCM).
- Built an event-driven integration between ODIN and the Purchasing Service using Kafka, automating purchase-order status synchronisation across distributed services.
- Delivered the Financial Aggregator Service (FAS) - ODIN integration and SAP-based B2B order migration, improving data flow across B2B order processing.
- Designed and implemented a direct Picker-to-Packer handover workflow for scanned orders, eliminating a manual processing step and saving Rs.6 lakhs/month (~£4,600).
- Engineered SKU barcoding across warehouse operations, reducing manpower costs by Rs.20 lakhs (~£15,000).
- Automated the Re-GRN workflow, reducing manual effort by 40+% and saving 15+ minutes per GRN.
- Resolved inventory mismatches across 50+ vendors through vendor-level financial segregation, improving reconciliation accuracy by 25+%.
- Scaled the SKU Audit application to process 10K+ SKUs/month, improving audit efficiency and accuracy by 20%.
- Optimised Patient Support Program (PSP) delivery processing, reducing turnaround time by 50% and mitigating compliance risks.
- Handled on-call production support alongside development and delivery, resolving 15+ incidents/month while contributing to sprint planning, retrospectives and technical design discussions, documenting solutions and mentoring 3+ junior engineers.

## Software Engineer

Tata Digital Health

Jul 2021 - Oct 2022

Bangalore, India

- Developed and maintained backend RESTful APIs for a patient and doctor facing telemedicine platform supporting 1,000+ consultations daily, including digital prescription (Rx) issue and retrieval.
- Implemented personalised, demographic-based symptom prompts and language-based doctor matching across 4+ languages, reducing consultation setup time by 15+% and widening access for non-English-speaking patients.
- Integrated Single Sign-On (SSO) to unify login across platforms and delivered push notifications for appointment reminders and consultation updates.

## Software Engineering Intern

Cognizant

Feb 2021 - Jun 2021

India

- Developed backend services using Java, Spring Boot, Spring Data JPA and Hibernate, applying Test-Driven Development with JUnit across full-stack project work.
- Led a 4-member project team, coordinating task allocation and delivery; earned a return offer for the Programmer Analyst Trainee role on successful completion.

## EDUCATION

---

### MSc Advanced Computer Science

University of Manchester

Sep 2025 - Sep 2026

Manchester, United Kingdom

Global Future Scholarship Recipient

### BTech in Information Technology

Sona College of Technology

Aug 2017 - Apr 2021

Tamil Nadu, India

CGPA: 8.92 / 10

## PROJECTS

---

### NutriVision

- Adapted BLIP-2 for automated dietary assessment using LoRA fine-tuning with PyTorch and HuggingFace PEFT.
- Benchmarked three parameter-efficient fine-tuning strategies across five tasks on the Nutrition5K dataset.
- Designed a zero-cost inference-time post-processing pipeline, improving dietary reasoning accuracy without additional training or parameters.

### Healthcare Monitoring Using Machine Learning - Published, IJPRSE

- Built a full-stack web application using Python, Flask and scikit-learn to predict patient health-risk levels from biometric inputs (age, BMI, blood pressure, pulse rate, temperature).
- Trained a Decision Tree classifier with Pandas/NumPy preprocessing and joblib serialisation; deployed via a Bootstrap 4 interface for real-time risk classification.

### Sentiment Analysis - AFINN & WordNet

- Built a Python desktop app (Tkinter) fetching live tweets via Twitter API (Tweepy).
- Classified sentiment as positive, negative, or neutral using AFINN and WordNet/SentiWordNet lexicons.
- Applied NLTK preprocessing - tokenisation, POS tagging, lemmatisation and stemming.
- Visualised sentiment distribution as a pie chart using Matplotlib.

### Healdroid - IoT Health Monitoring

- Built an IoT system using Arduino/ESP8266 to stream biometric data (heart rate, body temperature) to ThingSpeak cloud via WiFi.
- Developed an Android mobile app in Java for real-time remote patient monitoring via ThingSpeak API and JSON.
